Contents

Chapter 1 Introduction	01
1.1 Background of the Study	01
1.1.1 Small farmers and shrimp culture in coastal Bangladesh	01
1.1.2 Causes of salinity increase in coastal Bangladesh	05
1.1.3 Present cropping systems in the coastal area of Bangladesh	08
1.2 Review of the Previous Studies	10
1.3 Objectives of the Study	12
1.4 Outline of the Study	13
Chapter 2 Shrimp Based Cropping System in Bangladesh and Other South and Southeast Asian Countries	17
2.1 Introduction	17
2.2 History of Shrimp Farming	20
2.3 Shrimp Cultivation Systems	26
2.3.1 Culture technique	26
2.3.2 Cultured species	30

2.4 Impact of Shrimp culture on Mangrove Forests	31
2.5 Shrimp Based Cropping Systems	34
2.5.1 Shrimp based rice cropping systems	34
2.5.2 Farming systems based on shrimp and other species	37
2.6 Discussion and Conclusion	39

Chapter 3 Development of Shrimp Based Cropping System in the Coastal Area of Bangladesh

3.1 Introduction	45
3.2 Methodology	48
3.2.1 Research site and physical settings	48
3.2.2 Data collection procedures	50
3.3 Results and Discussion	51
3.3.1 Topo-sequence of the study village	51
3.3.2 Cropping systems and their distribution	54
3.3.3 Changes in land use with cropping systems	54
3.3.4 Shrimp cultivation technique adopted by local farmers	56
3.3.5 Rice and shrimp based cropping systems	61
3.3.6 Consequent impacts of the systems	64
3.4 Conclusion	68

Chapter 4 Cost Analysis of the Shrimp-Based Cropping System in Coastal Bangladesh	71
4.1 Introduction	71
4.2 Research Methodologies	74
4.3 Results	75
4.3.1 Shrimp and rice cropping systems in the study area	75
4.3.2 Economic return from <i>boro</i> rice and <i>aman</i> rice	76
4.3.3 Economic return from shrimp culture	79
4.3.4 Comparative economic return from the cropping systems	82
4.3.5 Relationship between cost and income of rice and shrimp with farm categories	83
4.3.6 Land tenure system and its relationship with shrimp and rice cropping systems	85
4.4 Discussion	87
4.5 Conclusion	91
Chapter 5 Effect of Shrimp Based Cropping System on Salinity and Soil Fertility	95
5.1 Introduction	95
5.2 Materials and Methods	97
5.2.1 Study area	97

5.2.2 Soil sample collection and chemical analysis	97
5.2.3 Water sample collection and analysis	98
5.2.4 Data analysis	99
5.3 Results	100
5.3.1 Salinity level and soil fertility status between the cropping system	100
5.3.2 Changes in salinity level and soil fertility status during 2010 - 2012	101
5.3.3 Changing rate of salinity level and fertility status between 2010 and 2012	102
5.3.4 Water Salinity	103
5.4 Discussion	104
5.5 Conclusion	108

Chapter 6 Shrimp Based Cropping System and Rice Varieties Selection by the Farmers

6.1 Introduction	111
6.2 Methodology	113
6.2.1 Study area	113
6.2.2 Matrix ranking	113
6.2.3 Collection of yield component data of rice varieties	114
6.3 Results and Discussion	115
6.3.1 Irrigation Facilities for rice cultivation	115

6.3.2 Rice varieties cultivated by the local farmers	116
6.3.3 Farmers preferences to choose the rice varieties	118
6.3.4 Yield components of different rice varieties	124
6.4 Conclusion	125
Chapter 7 General Discussion and Conclusion	129
7.1 General Discussion	129
7.1.1 Shrimp based cropping system by small farmers in coastal Bangladesh	129
7.1.2 Cropping system changes from a rice based to shrimp based	132
7.1.3 Shrimp- <i>boro</i> rice cropping system as safety net for small farmers in coastal Bangladesh	134
7.2 Conclusion and Recommendation	137
References	141
Index	171
